Skills

- **Languages**: Java, Python, C, C++
- **Frameworks**: HTML and CSS, Node js
- **Tools/Platforms**: MySQL, MongoDB, Git, GitHub
- **Soft Skills**: Problem-Solving, Team Work, Leadership, Adaptability

Training

C++ Programming & Data Structures | CSE, LPU | Link June 2025 – July 2025

- Developed a system for student registration, room allotment, and record management using C++.
- Utilized arrays, linked lists, queues, and search algorithms to ensure efficient data handling and processing.
- Implemented modules for room availability tracking, warden login authentication, and record updates to improve system usability.
- Built a C++ hostel management system using arrays, linked lists, and queues for efficient student records and room allotment.

Projects

Hostel Management System (C++) | GitHub | Live June 2025 – August 2026

- Analyzed challenges in manual hostel administration such as student records, room allocation, and availability tracking, and designed a centralized C++-based system to streamline hostel management operations.
- Replaced traditional register-based workflows by implementing structured modules for student registration, room allotment, and record maintenance using arrays, linked lists, and queues for efficient data handling.
- Enhanced system usability by adding features like room availability lookup, warden login authentication, and record update functionality, ensuring faster access, accurate data management, and smoother operational flow.
  Tech: React.js, MySQL, Bootstrap, Node.js+

Stock Intraday Screener | GitHub | Live June 2025 – July 2025

- Analyzed short-term market movements to identify high-momentum stocks by designing an intraday screening system based on multi-timeframe price analysis (>1% moves).
- Automated trade signal detection by implementing volume-spike analysis across 1-minute to 1-hour intervals, enabling faster identification of potential intraday opportunities.
- Optimized screening performance by leveraging Python with Pandas, NumPy, TA-Lib, and live market APIs to process real-time market data and generate actionable insights.
  Tech: HTML, CSS, JavaScript, Node.js

Certificates

- ChatGPT-4 Prompt Engineering: ChatGPT, Generative AI & LLM | Infosys | Link — September 2025
- Master Generative AI & Generative AI tools | Infosys | Link — November 2024
- Computational Theory: Language Principle & Finite Automata Theory | Infosys | Link — August 2025

Achievement

- Solved 100+ Coding Problems on LeetCode to sharpen problem-solving skills. — Since June 2025

Education

- **Lovely Professional University** — Phagwara, Punjab
  Bachelor of Technology - Computer Science and Engineering; ***CGPA: 6.00*** — *Since August 2023*
- **Chandradeo Narayan College** — Muzaffarpur, Bihar
  Intermediate; ***Percentage: 61%*** — *April 2022 - March 2023*
- **U H S jitachhapra** — Muzaffarpur, Bihar
  Matriculation; ***Percentage: 60%*** — *April 2020 - March 2021*
